

BIOS LIFE SLIM

Product Information Summary

INGREDIENTS	NUTRIENTS	AMOUNT PER SERVING	MECHANISM OF ACTION
Biosphere Fiber™	Guar Gum Gum Arabic Locust Bean Citrus Pectin Oat Fiber Maltodextrin Beta Glucans	4 grams	A patented blend of 5 highly soluble fibers combined with mineral carbonate that quickly forms a fiber matrix in the digestive tract. -Reduces appetite and absorption of fat -Glucose is moderated by delayed absorption and decreased glycemic index of carbohydrates allowing for fat burning. -Bile acid is sequestered and decreases cholesterol levels. -Beta Glucans are a key factor in immune health.
Unicity 7X™	Proprietary blend of plant derived polysaccharides Flavor - Orange juice powder with Citric acid and sucralose		Helps restore the brains sensitivity to Leptin* This decreases appetite and cravings and increases metabolism which is key to FAT LOSS *Leptin is a hormone produced by fat cells which helps regulate appetite and metabolism.
Bios Cardio Matrix™			On average lowers LDL 31%, raises HDL 29% and lowers triglycerides 40%. Lowering LDL facilitates fat burning.
Phytosterols	Soy Bean Extract Sunflower Extract	1 gram per serving*	Blocks food-based cholesterol from being absorbed into the bloodstream by blocking the cholesterol transport mechanisms in the intestinal tract. *Foods containing at least .65g per dose of phytosterols (plant sterol esters), taken twice a day with meals for a total daily intake of 1.3g may reduce the risk of heart disease associated with high cholesterol levels and are recommended by the NCEP guidelines
Policosanol	Sugar Cane Extract	6 mg	Lowers LDL by inhibiting HMG-CoA reductase without the unwanted side effects of statin medications. Reduces LDL oxidation and platelet aggregation.
Chrysanthemum Morifolium	Chrysanthemum Extract	12.5 mg	Activates an enzyme called 7-alpha hydroxylase that removes LDL cholesterol and converts it into bile acids.
Bios Vitamin Complex™	Beta Carotene Vitamin C (ascorbic acid) Vitamin E (d-alpha-tocopheryl)	750 IU 15% 45 mg 75% 20 IU 67%	Antioxidants that help prevent Lipid and LDL oxidation and strengthen the immune system
	Chromium polynicotinate	100 mcg 84%	Enhances effectiveness of insulin—reduces blood glucose levels
	Calcium Carbonate	60 mg 6%	Provides for gel like matrix formation in the digestive tract which delays absorption of food, especially carbohydrates.
	Vitamin B complex B1 Thiamin B2 Riboflavin B3 Niacin B6 Pyridoxine B7 Biotin B9 Folate B12 Cyanocobolamin	2 mg 134% 2 mg 118% 26 mcg 130% 7 mg 350% 20 mcg 7% 220 mcg 55% 25 mcg 417%	Powerful B complex that helps breakdown nutrients into energy. Biotin helps metabolism and use of free fatty acids for energy
	Zinc Gluconate	2.33 mg 16%	Essential for cellular health
	Selenium	3 mcg 5%	May inhibit LDL oxidation
